Thu, 10 Jan 2019 08:46:00 GMT Molecular biology - Wikipedia - In molecular cloning, a vector is a DNA molecule used as a vehicle to artificially carry foreign genetic material into another cell, where it can be replicated and/or expressed (e.g.- plasmid, cosmid, Lambda phages). Wed, 02 Jan 2019 19:54:00 GMT Vector (molecular biology) - Wikipedia - I cloroplasti si presentano generalmente come dischi piatti del diametro di 2-10 micrometri e spessi circa 1 micrometro. Il cloroplasto Ã¨ delimitato da due membrane; la membrana esterna Ã¨ permeabile per la maggior parte delle molecole, mentre quella interna Ã¨ decisamente piÃ¹ selettiva ed Ã¨ attraversata da proteine di trasporto specifiche.
