GMT laidler chemical  
kinetics 4th edition pdf -  
The rate law or rate  
equation for a chemical  
reaction is an equation that  
links the reaction rate with  
the concentrations or  
pressures of the reactants  
and constant parameters  
(normally rate coefficients  
and partial reaction orders).  
For many reactions the rate  
is given by a power law  
such as Rate equation -  
Wikipedia - In chemical  
kinetics, the overall rate of  
a reaction is often  
approximately determined  
by the slowest step, known  
as the rate-determining step  
(RDS) or rate-limiting step.  
Rate-determining step -
