Psychoneuroimmunology of Stress and Mental Health

- Psychoneuroimmunology has emerged as a discipline advancing our knowledge of the relationships among psychosocial factors, the central nervous system, the immune system, and disease. Thu, 24 Jan 2019 18:24:00 GMT  
Psychoneuroimmunology: Stress, Mental Disorders, and ... - Given the book's title, which implied that I would learn about how stress, mental disorders, and health are related to psychoneuroimmunology, I felt deceived. The book does in fact go into significant detail about how psychological states affect the disease process in patients with cancer and with HIV-AIDS. Thu, 22 Nov 2018 22:52:00 GMT  
Psychoneuroimmunology: Stress, Mental Disorders, and ... - The immune system is a key element in the organism's defence system and participates in the maintenance of homeostasis. There is growing interest in the aetiopathogenic and prognostic implications of the immune system in mental disorders, as previous studies suggest the existence of a dysregulation of the immune response and a pro-inflammatory ... Psychoneuroimmunology refers, most simply, to the study of the interactions among behavioral, neural and endocrine (or neuroendocrine), and immunologic processes of adaptation. Its central premise is that homeostasis is an integrated process involving interactions among behavior and the nervous, endocrine, and immune systems.â€•
