Sat, 12 Jan 2019 03:50:00 GMT U.S. Frequency Allocation Chart - The end of Iridium flares? The first generation of Iridium satellites are being replaced with satellites of a new design which, unfortunately, are not expected to produce predictable flares. Mon, 14 Jan 2019 14:46:00 GMT Heavens-Above - In astronomy, air mass (airmass, or AM) is the path length for light rays from a celestial source to pass through the atmosphere. As it penetrates the atmosphere, light rays are attenuated by scattering and absorption; the thicker atmosphere through which it passes, the greater the attenuation. Air mass (astronomy) - Wikipedia - HD 140283, informally nicknamed the Methuselah star, is a metal-poor subgiant star about 200 light years away from the Earth in the constellation Libra, specifically toward Ophiuchus. Its apparent magnitude is 7.205. The star's light is somewhat blueshifted as it is moving

more toward than away from us and it has been known to astronomers for ... HD 140283 - Wikipedia -
